EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Esther Chong on Oct. 16, 2006.

An error in claim 3 at lines 7-8: "forming a color filter on the TFT, in direct electrical contact with the source and the drain, wherein said electrical contact is only at a portion" changes into "forming a color filter on the TFT, in direct contact with the source and the drain, wherein said contact is only at a portion".

The title changes into "Liquid crystal display device with color filter in direct contact with drain and source electrode of TFT"

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/27/2006 has been entered.

Allowable Subject Matter

Claims 1-8 are allowed.

Reasons for Allowance

Claims 1 and 3 are allowed since there is no prior art teaches a liquid crystal display device comprising:

- a color filter layer on the TFT to be in direct contact with source and drain (as Figs. 3E or 5E shown); wherein the contact is ONLY at portion where the color filter is overlapping ONLY edge portions of the source and drain so as to prevent light leakage and improve an aperture ratio
- a pixel electrode formed above the planarization layer and the color filter layer to be in electrical contact with the drain through a contact hole formed in the

planarization layer where the color layer is not formed (as Figs. 3E or 5E shown); wherein the contact hole is formed in the planarization layer at a position corresponding to the end portion of the semiconductor layer above the drain (as Figs. 3E or 5E shown).

Claims 2 and 4-8 are allowed since they depend on the allowed claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Nakata et al. (US 6778232 B2) disclose a liquid crystal display device comprising a color filter layer on the TFT to be overlapping with source and drain ONLY edge portions of the source and drain but **not directly contact to** source and drain.

Tsujumura et al. (US 6556271 B1) disclose a liquid crystal display device comprising a color filter layer on the TFT to be in direct contact with data line (not source) and drain.
